

## Meeting Notes for Emma :)

### ★ More References:

- History page: [Historyofnailart](#)
- Images: <https://pin.it/6qXWewa> There's a lotttt in here, you don't need to use too many just try to get a variety of styles (length, shape, color etc)
- The rest of the info should be available on the wiki pages provided

### ★ Visual style:

- Image treatment: hands and nails without a background

something like this for the homepage(?)

- Font can be expressive depending on the overall tone (probably more elegant and clean); the body text could contrast
  - You can try colors for the page background and text, but black and white might be best since the images are already colorful
- ★ Top navigation bar; cute idea to try: finger pointing at page title when on page??
  - ★ Style guide page built like a grid
  - ★ History page: scroll through timeline
  - ★ The different nail applications page may not be necessary tbh... if you want to briefly include some info onto another page (history probably) that's okay. Honestly the content outline can be followed loosely lolz, the main pages I want are the style gallery and history.
